

Risk Management Basics

Why Risk Management Education?

- ▶ Gain a common understanding of the essential elements of risk management
- ▶ Be better equipped to proactively prevent loss rather than simply reacting to reported events
- ▶ Establish and execute complete risk management programs:
 - Mitigate risks
 - Improving patient outcomes
 - Reducing financial loss

Ten Courses

Level 1	Level 2
Getting Started with Risk Management	Getting Started with Patient Safety
The First Step in Risk Management: Risk Identification	Risk Mapping and Maintaining a Risk and Patient Safety Program
Establishing a Culture of Safety	Everyone's a Risk Manager: Get Staff Involved in Patient Safety and Risk
Setting Priorities: Evaluating and Analyzing Risk	Make Risk Management Part of Daily Operations
Stopping Problems before They Start: Risk Prevention and Management	The Last Piece: Measuring and Monitoring Risk

Interactive, Engaging Content

- ▶ Full audio/voice-over for every slide
- ▶ Simple language and real-life examples
- ▶ Courses require *doing*, not just *reading*
 - Matching games
 - Drag-and-drop
 - Sequence and process activities

Navigation

Useful links and documents are provided under the "Resources" tab. 

 Make sure that your computer's sound is turned on.

 Use the "Previous" and "Next" buttons to navigate through the course.

Course Example

Put the six steps of the risk management decision-making process in the correct order.

1. Analyzing risks.
2. Selecting the most appropriate techniques.
3. Evaluating the effectiveness of the chosen techniques.
4. Implementing the chosen techniques.
5. Identifying loss exposures.
6. Examining response to exposures.

Course Example

The traditional six steps that serve as the basic decision-making process for risk management are as follows:

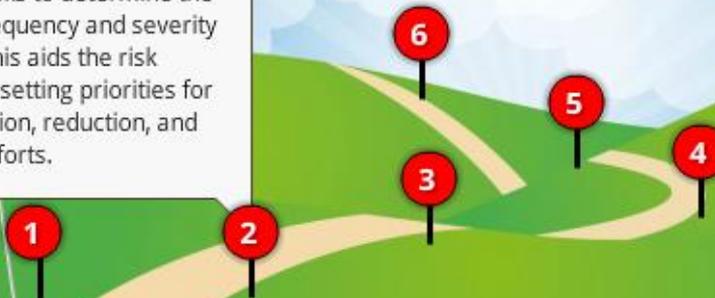

LEARNING OBJECTIVE

Identify the six steps of the risk management decision-making process.

Click the number

ANALYZING RISKS

The risk manager analyzes the identified risks to determine the potential frequency and severity of losses. This aids the risk manager in setting priorities for risk prevention, reduction, and financing efforts.

Level 1, Course 1

Course Example

Organizations are exposed to various types of potential loss. Risk managers must be aware of these loss exposures to develop effective strategies for identifying associated risks. Potential loss exposures include the following:
