

SELECTplus™

Unbiased, expert decision support for complex capital technology purchases

How do you know you're making the smartest, safest decisions when it comes to high-end capital expenditures? Are you relying on objective, expert guidance versus hype or clinician preference? Will the technology you are considering help you deliver safe, quality care and improve clinical outcomes, while bringing a solid return on investment?

SELECTplus, the industry-leading capital equipment advisory service, helps hospitals and systems save resources on medical equipment and health information technology without compromising patient safety or quality of care.

Get fast, accurate price benchmarks

Identify hard savings and strengthen your supplier negotiations.

Your personalised dashboard shows your recent activities, reports, and savings identified to date.

The power of market analytics at your fingertips

Track, trend, and compare technologies, manufacturers, and models all on one mobile, interactive platform—in a value analysis meeting, in the Operating Theatre or anywhere. The SELECTplus Market Analytics tool makes it easier to gain consensus from your stakeholders and reach the best decision.

- ▶ Compare data on functionally similar devices and models
- ▶ View pricing on popular technologies, including trade-ins and used equipment
- ▶ Compare service contract data, including pricing, level of service, and point-of-sale versus post-warranty
- ▶ Use "Rate this Model" to view user rankings

See what's trending

SELECTplus market intelligence reports give you quick access to comprehensive overviews of specific technology markets, including pricing and procurement trends, planning recommendations, feature-to-feature comparisons and average quoted pricing on popular technologies.

SELECTplus provides healthcare capital technology decision support for hospitals worldwide.

Build your capital budget on solid ground

The SELECTplus Capital Budget tool takes the pain out of the budget process. Build a clean standardised capital equipment list. Review suppliers, models, and devices online and evaluate the technologies on your budget wish list. Or, submit your budget directly to us for analysis.

See how your peers rank technologies you are considering

The SELECTplus User Experience Network gives purchasers another resource to inform technology decisions making, allowing members to view user satisfaction ratings and market analytics on popular technologies like linear accelerators, magnetic resonance imaging (MRI), computed tomography (CT) scanners, physiological monitors, and ultrasound devices.

Exclusive ECRI Institute services that make the difference

- ▶ We test devices so you don't have to. Side-by-side testing performed in ECRI Institute's laboratories helps you compare technologies on functional and clinical attributes
- ▶ Ongoing hazard and recall notices. Check for critical safety issues on devices you are considering with weekly notices of medical device problems, field corrections, and recalls, and ECRI Institute's recommendations for follow-up

Nearly 50 years of experience

- ▶ More than 5,000 healthcare organisations worldwide rely on ECRI Institute's cost, quality, and outcomes experience
- ▶ ECRI Institute's 450 interdisciplinary staff includes analysts, clinicians, engineers, scientists, risk managers, and patient safety and quality experts
- ▶ Independence: neither ECRI Institute or its staff undertake commissioned work for the medical device or pharmaceutical industries
