

Healthcare Risk Control

Making Your Job Easier Every Day with Actionable Tools and Recommendations

Healthcare Risk Control (HRC) combines world-class healthcare research, analytics, and guidance with individual, hands-on consultation. Our memberships will help you save time, accelerate patient safety improvement, and reduce risk for your patients, staff, and organization. With *HRC*, you can create a plan for improving patient and staff safety and quality of care across the continuum, plus have the tools to make actual change.

Access to the *HRC* website includes:

- ▶ Self-assessment questionnaires to help you evaluate current risk management and patient safety processes
- ▶ In-depth risk analyses with actionable patient safety and risk management recommendations
- ▶ Ready-to-use education and training tools to get staff in line with your improvement efforts
- ▶ Sample policies and procedures to tailor to your needs
- ▶ Weekly e-newsletter with the latest industry news, device problem reports, and literature abstracts
- ▶ Personalised consultation through telephone, e-mail, or fax. Call on our in-house experts for help with your toughest challenges

HRC guidance and recommendations cover hundreds of patient and worker safety topics. Examples include:

- ▶ Critical care safety
- ▶ Alarm management
- ▶ Surgical site infections
- ▶ Patient falls
- ▶ Communication and handoffs
- ▶ High-alert medications
- ▶ Anaesthesia safety
- ▶ Credentialing and privileging staff
- ▶ Emergency department safety
- ▶ Identifying and managing risk
- ▶ Proactive risk assessment
- ▶ Patient lifting and handling
- ▶ Chemical safety in clinical laboratories
- ▶ Diagnostic and therapeutic radiology
- ▶ Bloodborne pathogens and sharps injury prevention
- ▶ Palliative care
- ▶ Surgical fire prevention

*Practical, useful
resources, evidence-
based tools, analyses,
and strategies*

With so many risk management services available, why are we the top pick for healthcare providers worldwide?

For nearly 50 years, ECRI Institute has been dedicated to bringing the discipline of applied scientific research to discover which medical procedures, devices, drugs, and processes are best, all to enable you to improve patient care.

ECRI Institute's experience includes:

- ▶ Analysing more than 3 million patient safety reports
- ▶ Operating medical device problem reporting and evaluation systems and safety initiatives
- ▶ Creating programs in patient safety, quality, and risk
- ▶ Assessing and investigating patient safety and risk accidents and events
- ▶ Publishing authoritative risk reduction strategies and interactive tools

Our interdisciplinary team includes physicians; nurses; pharmacists, medical technologists; biomedical engineers; instructional designers; quality, legal, and risk management professionals; individuals with safety, education, science, and engineering backgrounds; statisticians and data analysts; and information technology experts.

“The risk management materials produced by ECRI cover a vast array of topics and do so in depth. The tools take it to the next step from academic to operational. They are an invaluable resource for risk managers in any healthcare setting.”

Virginia Kelley, MHA, ARM, CMPE, LHRM, FASHRM,
VP of Risk Management,
Florida Doctors Insurance Company
