

Assisting Safe Cost-Effective Acquisition and Management of Medical Technology

A comprehensive online membership resource, offering unbiased medical product assessments and ratings, searchable system of device safety alerts, expert technology guidance, comprehensive device specifications, supplier information, free consultations, webinars and more.

Device Evaluation Plus delivers a broad suite of resources to select, use, maintain, and manage healthcare technologies, with powerful online tools and resources to support informed product selection and purchasing. Membership includes:

In-depth evaluations and comparative ratings on healthcare products. Expert guidance on current technology topics

Healthcare product safety alerts covering medical device problems, field corrections and recalls, with recommendations for follow-up

Searchable database of technology overviews and product specifications for capital medical equipment. As well as customised Request For Proposals

Easily downloadable files of medical product manufacturers and distributors, device nomenclature names and codes, manufacturer profile information

Free web conferences on critical healthcare technology issues

Device Evaluation Plus supports your medical technology selection, procurement and management

About ECRI

ECRI is an independent, non-profit organisation improving the safety, quality, and cost-effectiveness of care across all healthcare settings. With a focus on patient safety, evidence-based medicine, and health technology decision solutions, ECRI is the trusted expert for healthcare leaders and agencies worldwide.

Let's take a closer look on how Device Evaluation Plus can reduce costs, lower risk, save time and help you choose the best technology for your needs.

Device Evaluation and Alerts Guide

Get the greatest value from your health technology investments. Backed by independent analysis and onsite laboratory testing, Device Evaluation offers in-depth comparative equipment evaluations, product ratings, patient safety alerts, and expert guidance to inform your purchasing decisions.

Clinical engineering, procurement and risk management departments rely on this membership program to help navigate today's complex health technology challenges.

- Evaluations and guidance - test results, product ratings, and unbiased recommendations for safe, cost-effective management of today's complex medical technologies
- Healthcare product alerts - safety alerts covering medical device problems, field corrections, and recalls, with recommendations for follow-up.
- Web conferences on critical healthcare technology topics—free to members

Device Comparison Guide

Searchable database of technology overviews and product specifications for capital medical equipment.

- Online database of over 200 types of devices
- Request for Proposal (RFP) templates in Excel format containing the basic information you need to create RFP documents. ECRI's recommended specifications are also included
- Side-by-side model specifications of international products that help you narrow the selected fields quickly and easily
- Technology overviews with important insights you won't get directly from the manufacturer, to help make well-informed purchasing decisions

Vendor Guide

Make more informed medical device purchases with Vendor Guide. Searchable database of medical product manufacturers and distributors and the products they supply. Cross-reference companies and devices, find trade names, key contacts, and company certifications. Find information on more than 1,000 service companies and 15,000 medical product suppliers, plus 113,000 trade names. Access detailed records on 16,700 medical manufacturers from around the globe

Over 10,000 detailed device definitions that provide need-to-know background information help you understand technologies and differentiate similar device types.

- Understand devices. Detailed device definitions provide need-to-know background information to help you understand technologies and differentiate similar device types.
- Standardised nomenclature. Improve your searches using Universal Medical Device Nomenclature System™ (UMDNS™), our standard international nomenclature and computer coding system.
