

Improve patient safety and reduce hospital acquired infections. ECRI's IPC Services include online risk assessments and flexible consulting models. ECRI helps ensure that you are prepared for the next outbreak, your safety culture is improved, best practices are implemented, and technology optimally leveraged.

“ **Good IPC programmes can reduce health care infections by 70%.** ”

Source: WHO Global report on Infection Prevention and Control

HAIs are now the most frequent adverse events in healthcare delivery, costing an estimated USD9.8 billion annually, leaving lives at risk.
